

PALUMA ENVIRONMENTAL EDUCATION CENTRE

LEAF LITTER INVESTIGATION

Instructions:

1. Discuss natural recycling in the rainforest and the 'Nutrient Cycle'
2. What you should do:-
 - Find a suitable thick patch of leaf litter.
 - Crouch right down close to the leaf litter.
 - Look for anything that is moving. If you don't see anything, use a twig or stick to move the leaves to see if something is under the top layer.
 - Carefully catch a creature and use your 'Peek-a-Boo' to have a closer look at it.
 - Use the identification card to try to identify your creature. Draw a sketch of your creature and name it.
 - Describe how it was moving.

Name and Drawing of Creature	How was it Moving?
